

STRATEGIC
NATURAL RESOURCE CONSULTANTS

It's your time to lead.

Now Hiring

Manager: Integrated Environmental Team

Come join our North Island Central Coast management team in **Port McNeill**, Vancouver Island.

Since 2003, Strategic Natural Resource Consultants has been delivering professional services across BC. With over 150 staff across six offices practicing in disciplines such as biology, forestry, geomatics, engineering, technology and business, we manage a diverse array of projects for a variety of clients. Working with the Regional Manager, you will lead and grow a team of professionals as we deliver our business in Natural Resource Management & Planning in the Forestry, Energy, Mining, Transportation and Environmental Protection sectors.

Things we are looking for:

- Education in a natural resource discipline: Environmental Science, Biology, Forestry, or related
- Experience in the resource sector: Biology, Forestry, Environmental Management, or related
- Leadership capacity: We are looking to **grow** with someone – we are more interested in the potential than previous experience at this level

Role Strengths:

**LEADERSHIP EDUCATION TEAMWORK
GROWTH DRIVE BUSINESS CREATIVITY
EMOTIONAL INTELLIGENCE CONNECTIONS**

Strategic Natural Resource Consultants is an Employee Owned (ESOP) company and one of Canada's Top 100 Employers (2019)

LEAD a team of 15+ natural resource professionals with diverse backgrounds. Our people are experienced, enthusiastic, educated and dedicated to our purpose of serving our crew, our clients and our communities.

BALANCE sustainable development with environmental conservation from remote rural locations to reclaimed industrial sites to new urban development areas across Vancouver Island and the Central Coast.

CULTIVATE both the talent and the opportunities to deliver world-class environmental services from the site level to the landscape level in the places we live work and play.

APPLY your scientific, technical and professional skills as part of various project teams in areas such as biological research and assessments, ecosystem analysis, wildfire management, silviculture and forest planning, carbon inventory and capture initiatives, environmental and forest enhancement, urban forestry and more.

STRENGTHEN your business management skills in leadership, teamwork, human resources, finance, planning, and project management.

A proud member of
